

Role

Air Quality Consultants

25-32k

Locations: (Flexible) – Midlands or Hampshire

A market leading global consultancy is looking to strengthen their Air Quality team. They are therefore looking for an experienced industrial air quality specialist.

The candidate will require extensive experience of consultancy work in industrial air quality and full familiarity with industrial pollution abatement techniques, particularly with respect to IPPC, is expected.

The candidate would report to the Technical Director in charge of the Air Quality Team but would be expected to be able to build the team without excessive supervision. An ability to communicate in all forms should be demonstrated in addition to exhibiting management and leadership abilities.
