

# Role

## **Asbestos Surveyor/Analyst**

**Location: Bristol**

This well respected environmental consultancy has been successful in securing some lucrative contracts in the South West region, they are therefore looking to recruit several experienced Analysts to join them at this exciting and busy time.

The main aim of the post would be to provide high quality Asbestos Consultancy to clients.

Specific duties may include:

- \* Surveys of asbestos in buildings;
- \* Reassessments of asbestos in buildings
- \* Asbestos in air measurement and fibre counting;
- \* Management of health and safety in large asbestos works;
- \* Assist with provision of asbestos awareness training, asbestos briefings, tool box talks and other basic training for working safely with asbestos;
- \* Ensuring appropriate records are maintained;
- \* Liaison with clients, clients' staff and the clients' contractors;
- \* Working within the companies UKAS accreditation for sampling and analysis, as appropriate.

Ideally, the successful applicant will have experience in UKAS accredited asbestos service work and have P402 P403 and P404 modules. Candidates with an S301 would be highly desirable. The post holder must be able to work as part of a professional team comprising clients, their advisors and contractors.

The post will involve travelling and working at weekends and other unsocial hours are required from time to time. A company car is provided and a current driving licence is essential.
