

Role

Health & Safety Site Manager

The role of Health & Safety Site Manager will be involved in a range of projects for high profile clients including working on general construction projects and onshore renewable energy projects.

The role in Scotland will be based in the Ayre region and the other roles on offer will be predominately site based throughout the UK. This role will include both Health & Safety Consultancy & Management across a broad project range in the UK, Ireland and Northern Europe.

Experience of Health & Safety Site Management is essential and the successful candidate will also need to be client focused, so excellent communication skills and a strong team ethos are a prerequisite.

Essential

- Minimum of NEBOSH National General Certificate
- Experience of providing Health & Safety advice in a construction environment
- 3 years operational experience

Advantageous

- Membership of IOSH and / or APS
- Up to date knowledge of Health & Safety and CDM Regulations
- Experience of working in a consultancy environment
- Understanding of the renewable energy markets
