

Role

Principal Consultant – Contaminated Land

Overview

Our client, an internationally renowned environmental consultancy is looking to hire an experienced and motivated individual to project manage, technically deliver and client manage land contamination projects in their contaminated land team. This position offers the opportunity to be closely involved in a wide range of projects ranging from desk study through to remediation.

The role

The role will involve assisting in the management of a team of 13 professionals across the UK and winning new projects. Responsibilities will include:

- Project management and team leadership
- Leading site investigations, risk assessments and remediation strategies
- Client liaison
- Working through site problems with regulatory bodies
- Technical and interpretative report writing
- Attending conferences and seminars
- Site visits (UK wide)
- Business development activities
- Mentoring and training of team members

The candidate

You should have proven project management and team leadership capabilities as well as having a strong technical knowledge of areas including site investigation and remediation. You will also need a detailed knowledge of UK planning frameworks. The ideal candidate will have considerable business development experience, proven consultancy experience and an excellent academic background.
