

Role

Senior Consultant – Wind Energy

Our client is a leading company in the field of renewable energy, energy efficiency and climate change. In this position, you will be responsible for executing consultancy business in wind energy in the United Kingdom. You need to be able to manage and execute projects at principal consultant level, guarding budget, planning and quality. In the first year, most assignments will be focused around Environmental Impact Assessments and permits for wind farms. You are expected to manage consultancy works in close co-operation with the project developer, and also subcontract work to other Wind departments..

Your profile

- Proven experience in consultancy in renewable energy, preferably wind energy
- Knowledge and experience in Environmental Impact Assessments, landscaping studies, UK legislation on planning and permitting processes, is an important asset.
- Knowledge of local wind energy developments, the ability to build a network in the sector in the UK (project developers, authorities, utilities, consultants) in short term
- Vision and ability to set realistic and ambitious goals and able to realize them
- The ability to build up experience in consultancy services related to wind energy project development such as scoping studies, feasibility studies, consenting process wind resources assessments and impact studies; strong analytical skills, solution oriented approach
- Excellent communication and presentation skills.
- You will have a preference if you bring strong commercial attitude and entrepreneurial skills in identifying and seizing opportunities in a competitive market place

Our offer

We offer you the possibility to work in a consultancy business in wind energy, expand your own expertise and your own network of clients. You will be part of an international and dynamic environment. The company offers a good bonus structure and attractive flexible working conditions. There is a possibility to work on a part time basis.
