

Role

Senior Contaminated Land Consultant

Location: Ireland

Salary: €35000 ~ €50000

A well established consultancy is currently enjoying an increased workload and is subsequently looking to recruit an experienced Senior Consultant/Scientist/Engineer to join their busy Ireland operation with a view to developing to an Operations Manager role.

Candidates should have 4-8 years experience in contaminated land work, with a strong preference for hydrocarbon, remediation and contracting experience. More experienced candidates will be considered.

This is a great opportunity to join a very busy and progressive consultancy that has over the years built up an excellent reputation and an enviable portfolio of clients.
