

# Role

## Top Tier Wind Developer

### Project Manager, UK Offshore Development

This is a key management role in this world class organisation's UK Offshore Development team.

The key responsibility for this post is to deliver high quality, safe, fully leased and consented offshore wind farms. The focus is very much on development and the initial priority will be to deliver planning consents for Round 3 wind farms. From an early stage, the post will work within a Joint Venture (JV) company established for the development of one or more Round 3 Zones. The post will take a senior position within this JV company with primary responsibility for progressing development on a number of specific wind farm projects within a larger zone.

#### Detailed accountabilities will include:

- Understanding of health and safety requirements and compliance with same
- Responsible for the day to day management of the development of a group of wind farm projects.
- Recruitment, training, management, motivation, staff development and career planning of the required team.
- Detailed management and control of agreed budgets describing variance when appropriate. Contribute to annual setting of budgets.
- Management of the relationship with joint venture partners
- Regular communication of project progress to stakeholders. Identification and internal communication of opportunities and risks associated with the proposed development.

#### The successful candidate would ideally have:

- Extensive experience developing projects, ideally in the wind, power or offshore sector
- Excellent project management skills including a proven ability to manage complex projects with multiple stakeholders, internal staff, subcontractors and consultants
- Numerical ability with a degree in engineering, environmental science or comparable industry project management qualifications.
- Experience in one or more of the following core areas:
  - ✓ Environmental Assessment
  - ✓ Planning applications
  - ✓ Marine or civil engineering
  - ✓ Health and safety
  - ✓ Grid connection applications
- Excellent organisation and management skills
