

Lead Design Engineer

London

£-Attractive

We are working with a global energy company who require an experienced Design Engineer to join their team in London.

This particular role is varied in duties and responsibilities, some of which will include; Liaising with both internal and external clients, contractors, and suppliers and participating in both the internal and external technical reviews, design meetings, HAZID and HAZOP studies, creating conceptual layouts and understanding the outputs of piping stress analysis to identify design improvements, communicate the status of projects and tasks through the departments reporting structure and up keeping and managing project drawing registers, amongst a number of other tasks.

In order to be considered for this varied position, you will have a minimum of 10-15 years experience in a relevant field, with at least 3-5 of those years being in a similar role, be a chartered engineer who is engaged on a programme of continual professional development, possess a thorough working knowledge of relevant CIBSE Guides, BSRIA, IGEM, British Standards and other industry authority publications and experience of undertaking piping stress analysis using Caesar II or similar.

For all candidate requirements and role responsibilities contact Lucinda on the details below quoting **Job Ref: LS1799**.
