

**Service Engineer**

**London**

**£Competitive**

Our client has an immediate requirement for an experienced Service Engineer to carry out planned preventative and reactive maintenance within a number of commercial plant rooms and residential properties associated with the key delivery of their contracts.

The position holder will be responsible for looking after & maintaining assets associated with distribution and delivery of communal heating throughout connected buildings, deal with all investigations and responsive repairs within residential properties to ensure high levels of service delivery and will have a number of other varied duties, including carrying out 'out of hours' responses as part of a call-out roster team & maintaining all records & documentation.

In order to be considered for this role you will hold C&G/NVQ qualification in either Electrical, Mechanical or HVAC with relevant on the job experience, experience dealing with BMS, significant professional background in Building Services (with a stable and demonstrable employment history) and be competent to undertake first line fault finding, pipework, plumbing & basic electrical works.
