

Electrical Fitter

North West

£Attractive

A worldwide leader in the recycling sector is expanding and requires an experienced Electrical Fitter to join their team in the North West where they will be assigned a wide range of activities on site and as such experience in a similar role is essential as you will be expected to maintain industrial equipment and machinery, read drawings and utilise test equipment. You will also have experience of wiring and electrical panel building and an understanding of Programmable Logic Controllers (PLC).

To be considered you will hold appropriate qualifications or have completed a time served apprenticeship and have proven experience with maintaining heavy or industrial machinery.
