

Plant Fitter

South East

£Attractive

We are working with a leader in the heavy industrial engineering and waste industry who require an experienced maintenance fitter/engineer to join their expanding team in the South East and take on responsibility for a number of duties, including but not limited to; carrying out planned and breakdown maintenance on a variety of plant equipment including low voltage equipment, gearboxes, motors, mechanical drives, plant auxiliaries, hydraulics and pneumatics, supervise and coordinate on-site maintenance subcontractors and work schedules, respond to emergency situations and plant breakdowns when necessary and participate in the 'standby' rota and ensure PPM is carried out, reducing risk of downtime.

To be considered you will have City & Guilds/NVQ equivalent in Mechanical Engineering, qualification in coded Welding (MIG, MMA, MAG min NVEQ), understanding of maintenance strategy and PPM and solid experience working with Low Voltage equipment, material handling and motors.

To find out if you are suited, email Rebecca@candovergreen.com quoting **Job Ref: RB2056**
