

**Site Manager**

**South West**

**£Competitive + Car/Allowance + Bonus**

---

We are working with an international leader in the waste management industry who require an experienced site manager, with a deep understanding of the healthcare waste market, to join their diverse and growing team in the South West and take on full responsibility for operating a healthcare waste treatment plant in a profitable manner whilst ensuring compliance with technical and health and safety perspectives and developing the operation to allow acceptance of a wider range of waste materials; managing and leading site teams.

The successful candidate will also deal with instigating and maintaining an active CI program and propose, instigate and develop improvements to customer service/logistics, plant, process and people to exceed KPIs.

In order to be considered you will have a degree/HND equivalent in a Scientific/Engineering or waste management discipline, ideally a COTC in clinical waste in treatment and transfer, CPC & IOSH, and knowledge and experience of a management/supervisory role with knowledge of transport/waste sector.
