

## Static Plumbing Engineer

South East

£Competitive + benefits

We are working with a multi-disciplinary energy & services company who have the requirement for a Static Plumbing Engineer who will take on responsibility for the delivery of plumbing/mechanical works on site as required and develop and maintain good working relationships with customer representatives and work in a manner that ensures all aspects of the service agreement between our client and their customers are delivered fully.

The successful candidate will be expected to ensure the safe and efficient operation of existing plant and equipment and diagnose faults as required, attend site and resolve breakdowns or failures of equipment outside of normal working hours and ensure that the Site Supervisor is kept informed of all aspects of safety performance, plant performance and customer circumstances that may impact upon the safe, efficient reliable and cost effective operation of the plant.

To be considered for this role you must hold Mechanical C&G or equivalent qualifications, have extensive experience of M&E Building services within a corporate environment, good knowledge of the use of CAFM systems, good electrical knowledge and a full UK driving licence is preferable.
