

## Project Manager

South East

£Attractive

We are working with a rapidly expanding renewable energy solutions business that requires an addition to their project management team. The successful candidate will report to the Projects Director and assist in the direction, coordination, definition, control, execution and completion of various low-carbon projects, whilst making sure to remain in line with the goals, commitments and strategies of the company. You will also take on a number of other duties, including but not limited to; helping to define projects scope, requirements and deliverables, identify, source and manage project contractors and suppliers, run tender exercises, evaluate tenders, appoint contractors/supplies, manage contracts and approve payments, as well as creating schedules and project timelines.

To be considered you must have a full UK driving license, have a minimum of 3 years project management experience within a built environment and knowledge of project management techniques and tools and hold project management qualifications (e.g. PRINCE2, PMP), be educated to a tertiary level ideally in engineering or technical subject, and possess good understanding of the low-carbon sector and underlying technologies (e.g. Biomass, PV, GSHP) and have proven consultancy or contracting experience within this industry sector.
