

## Principal Climate Risk & Business Sustainability Consultant

UK

£Excellent

---

We are working with a leading Environmental Consultancy who have the requirement for an experienced Principal Consultant to work within their existing Business Sustainability team to support continued growth. This is an excellent opportunity to make your mark in a rapidly developing business area within a leading environmental consultancy. In order to be considered you should have a proven track record, strong market credentials and great customer and commercial skills. You will have demonstrable consultancy experience of working on climate risk and ESG projects at senior levels in the private sector and will work closely with other senior colleagues across the business to grow and deliver the team's portfolio of projects. Experience in developing leads, key account management, winning and delivering consultancy projects. The role will involve developing technical propositions and tailoring these for specific parts of the private sector. Experience of developing strategies for managing climate risk and conducting materiality assessments. Experience working in a consultancy capacity. Working knowledge of wider sustainability guidelines: the Principles For Responsible Investment (PRI). Broad consultancy experience across a number of the following: Climate-related financial risk / opportunity impact assessment, Science Based Targets (SBTs), Net-Zero strategy development, Sustainability strategies / corporate reporting (ESG / CSR), Excellent knowledge of key policy and technical issues in the context of the TCFD / ESG agenda, Track record of identifying and securing new consultancy work. This is an excellent opportunity to join a winning team.
