

Sustainability Consultant

Home Based

£Attractive

I am working with an award winning consultancy firm that works with many of the top ten UK housebuilders and developers to deliver high quality sustainability advice and assessments to the construction industry. They pride themselves on the quality and accuracy of the calculations that they undertake as part of their residential energy assessments using the Standard Assessment Procedure (SAP). Delivering these services to the award winning level of accuracy and professionalism requires extensive technical knowledge from their team of consultants and competence and understanding of the calculation software that they utilise. They are therefore looking to recruit enthusiastic, experienced consultants who will assess energy consumption and CO2 emissions using the Standard Assessment Procedure (SAP) methodology and provide consultancy services in relation to residential and mixed use developments. The successful candidate will be a team player with the ability to manage a busy and time-critical schedule of work. Good attention to detail is essential as the role requires a high degree of accuracy and organisation skills.

Job Responsibilities:

- Acting as Project Lead, responsible for the financial and project management of the delivery of SAP assessments and other sustainability services to a range of projects from residential developments to complex mixed use schemes
- Provision of consultancy and assessments in relation to SAP
- Providing high quality consultancy and written reports at land purchase and planning stage to ensure that planning requirements are met
- Active engagement with the client and design team to ensure that sustainability requirements are taken into consideration and achieved over the lifecycle of the development
- Utilization of resources from within the team to ensure that the client receives timely, high quality advice and assessments
- Provide mentoring to more junior team members

Ongoing training will be provided but candidates will preferably:-

- Be an accredited On Construction Domestic Energy Assessor
- Conversant with Building Regulations throughout the UK and in particular in relation to the conservation of fuel and power
- Have experience of leading the delivery of sustainability services in relation to residential schemes
- Have experience of providing consultancy at planning stage and writing energy/sustainability strategies
- Have a good working knowledge of the non-residential development
- Have an ability to visualise in 3D and interpret technical drawings
- Have prior experience in a client-facing situation
- Be a team player and maintain good humour in times of stress
- Possess a full driving license

Furthermore, the successful candidate would be at an advantage if they are:-

- Familiar with planning requirements and experienced in the production of planning reports
- Conversant with M&E specifications

What the company offer:

In addition to a great working environment and opportunities for career progression they offer some excellent benefits, such as:

- Competitive salary depending on experience
- Flexible hours
- Support for remote working
- Annual holiday allowance, with additional days based on length of service
- Contributory pension
- Discretionary bonus
- Staff social events
