Environmental Data Analyst

Yorkshire   **£Attractive**

I am working with an Environmental Consultancy that have an opportunity available for a Data Analyst to be an integral part of the operations team providing strong account management and technical support to existing customers (in line with the customer service policy) ensuring a positive retention record is maintained and building strong customer relations. Carrying out detailed data analysis when required and supporting the sales team in the achievement of company growth targets by offering technical input with the securing of new business and ensuring opportunities are optimised within the existing customer database. Full induction and training program in place and there are excellent opportunities and support for candidates with the right competencies. In summary, this is an ideal opportunity for an outgoing, intelligent, analytical and ambitious individual looking to grow their career in the environmental sector and develop within a forward-thinking company. In order to be considered for the role you will have a Degree in an environmentally focused subject, strong IT skills and be an expert using MS Excel, you will be passionate about the environment and be excited at the prospect of helping businesses minimise their environmental impact. At the very least you need to be outgoing and confident speaking with customers with a strong focus on customer service and find building strong relationships easy. You will work well in a team with a 'muck in' approach being flexible and highly resilient, being committed to growing with the business through a period of transformational change. You must have a strong work ethic working well under pressure with excellent organisational skills and the ability to meet deadlines. A UK driving license will be required in order to carry out on-site customer visits.
