

Principal Consultant

UK

£-Attractive

We are working with a leading environmental consultancy. They now have an exciting opportunity for an experienced Principal Consultant to join the Waste and Resource Management team. The Principal Consultant will lead projects, lead proposal development and support business development activities. In addition to these activities, my client is looking for a lead on waste data management tasks - focused on waste flow modelling and carbon assessment tasks. The successful applicant will be working on strategic projects in the UK and internationally, for local authorities and private sector clients, therefore adaptability and flexibility are essential. In order to be considered you will be an experienced waste management expert, ideally with extensive consultancy experience of providing innovative solutions to public and private sector clients. Qualified to post-graduate level in a relevant discipline, you should have several years' experience in senior consultancy or other relevant sector employment. You will need to demonstrate a track record in developing waste and resource management solutions, working with organisations to implement change and be in possession of strong project and client management skills. You will have skills in using business management systems, business development, proposal writing, report writing and data analysis; Experienced in delivering carbon assessments including the use of impact assessment tools such as WRATE. An understanding of waste and recycling management systems; Understanding of waste legislation and policy in the UK; Experience of working with Officers and elected members at a senior level; An understanding of local authority governance, pressures, constraints and opportunities; An understanding of waste strategies and the options available to implement them; Experience of analysing operational and financial data to identify and understand the root causes of issues, and develop solutions; Waste data management and modelling, including carbon assessments; High levels of written and verbal communication skills and confident delivery of presentations.
