

Mobile Water Treatment Engineers

Reading (covering the South of the UK)

£-attractive

I am working with a leading energy and services company focused on three key activities: production and supply of low carbon energy, services and regeneration. They now have the opportunity for a number of Mobile Water Treatment Engineers. Representing the businesses Compliance as a Water Treatment Technician, this role is responsible for the execution and the self-delivery of all Water Treatment services across the South of the UK. Interpersonal skills will be key to gaining the trust and confidence of all Clients, effectively working with the Technical team supported by Schedulers and Contract Administrators to efficiently deliver Water Treatment Planned and remedial works utilising system tools. In order to be considered you will have; City and Guilds or NVQ equivalent qualification for Mechanical discipline; 5 years post qualification experience; Up to date knowledge of technical regulations including Water Byelaws, L8; ACOP and Guidance; Fault diagnosis and resolution experience. Willingness to work overtime is needed, as well as the requirement to participate in a call-out rota. This is a permanent, full-time role working 40 hours per week as well as participating in a call-out rota.
