

Pre-Construction Manager/CDM Advisor

Site based

£-attractive

Our client is a key provider of flexible, renewable electricity generation and clean, affordable energy supply to businesses of all sizes and is focused on three key activities: production & supply of low carbon energy and services. They enable their customers & stakeholders to embrace a greener and more efficient world.

They also combine their services-led activities, providing technical, FM, energy solutions and regeneration to support businesses and communities through the energy, digital and industrial transitions.

The Pre-Construction Manager will be working primarily on small construction products on up to the value of £2 million. The role will be site based and the successful candidate will be responsible for all matters relating to pre-construction for several construction and additional works projects.

The Pre-Construction Manager will need to be experienced in all matters relating to pre-construction with a strong knowledge of CDM to assist and advise the construction team from concept, planning and to the delivery of projects.

This is a dual role, also acting as CDM Advisor you will be responsible for advising on health and safety risk management in accordance with CDM regulations, ensuring the projects meet their legal requirements.
