

Project Consultant (6 Month contract)

UK

£-competitive

The purpose of this role is to support the Managing Director (Project Lead) to design, implement and manage paper cup recycling schemes across multiple sites in both France and Germany. Some of your responsibilities and duties will include but not be limited to; Consult with all relevant stakeholders at cup collection sites to establish the requirement for cup collection bins & marketing collateral, as well as designing on-site processes to generate uncontaminated sacks of used cups for collection; Consult with all used cup collectors, aggregators & re-processors to ensure the onward transport of used cups to their intended destination at the required specification; Schedule regular calls and sites visits with cup collection sites, cup collectors, aggregators & re-processors to assess progress, resolve problems (where possible), or escalate critical issues to the to the Project Lead; Work with the Project Lead to develop an automated & transparent reporting platform for used cup collections that is sufficiently robust to be scaled up significantly. On order to be considered you must have; Proven experience in managing and delivering projects in the resource management sector to strict timescales involving multiple stakeholders - ideally across multiple countries; Excellent understanding of the paper cup supply chain and recycling process, or at least an understanding of similar materials and/or disposable food & beverage packaging; Excellent communication and problem solving skills; Ability to speak French and/or German is highly desirable.
