

## Quantity Surveyor

**Manchester**

**£-attractive**

My client is a technical services & facilities management, energy efficiency and regeneration services provider and due to expansion, now have the requirement for a Quantity Surveyor to be based at their office in Manchester. The main purpose of this role is to take responsibility, ownership and accountability of the successful management and control all aspects of the commercial / financial and contractual elements of the designated project in order to control and maximise the company's profitability, protect the companies legal and contractual obligations under the contract and to manage proactively the control of all commercial issues. This is to include ensuring applications and valuations are completed in line with the contract terms and also ensuring sub-contractors receive prompt payment and are procured in line with their contractual obligations and commitments to subcontractors. In addition, ensuring cost reports and the like are managed, completed on time and monitored. To understand, implement and adhere to the company SHEQ policy/strategy. Control all expenditure. In order to be considered for this role you will have; Industry experience in the role of a Quantity Surveyor; Post graduate experience within a surveying position reporting to either a Senior Surveyor or a Commercial Manager; Excellent verbal communication skills; Excellent level of numeracy; Excellent influencing skills; IT skills - MS Office, Excel, Project, Word; Excellent Time Management; Ability to work under pressure; Prepared to work within various geographical areas.
