

IT Manager

Yorkshire

£-attractive

A fantastic opportunity has arisen to join a fantastic and expanding environmental/waste consultancy. They are looking for an innovative, collaborative and organised IT Manager to work as part of the Senior Management Team in a dynamic, evolving company, who are driven to make a real impact on humanity and the planet. As IT Manager you will be responsible for leading their Systems team managing both the existing IT infrastructure and spearheading innovative technological advancements. Utilising technology, customer insights, data, and AI to catalyse significant growth, enhancements, and efficiencies within the business in line with their strategic goals. In order to be considered for this position you will have at least; 5 years' experience in a technical / systems role or in the industry and have strong technical knowledge across a broad range of IT systems, software and hardware. You will be a forward thinking innovator who keeps up to date with the latest technical trends and developments with a view to always find a more efficient way of working. Previous experience having developed or implemented a technology strategy is key as is a track record in IT project management. You will have excellent customer service and communication skills to effectively convey technical concepts to non-technical individuals. Previous experience of managing people is a must, and your leadership skills should be motivational and inspiring to a team. You will have the ability to prioritise, multi-task and manage time effectively, to ensure deadlines are met. You need to be able to positively challenge the status-quo and have the ability to turn a challenge into a positive result. To thrive in this role you'll be able to work in a fast paced environment, whilst being passionate and excited to work for a business for good. As a member of the Senior Management Team you will be self-aware, self-managing, reflective and positive. You will work well in a team with a 'muck in' approach being flexible and highly resilient.
