

UK

QHSE Director

£-attractive

Leading a small team of plant based QHSE Technical staff, the responsibilities of the role will include ensuring that plant and HQ operations, implement, monitor and review the preventative and protective measures necessary to minimize workplace accidents and injuries, while minimizing operational losses and ensuring legislative compliance. Developing and establishing robust quality control systems to support the projected business growth and domestic and export sales will be a key feature of the role. As the champion of Quality, Health & Safety and Environment the role will seek to further develop across the business, a structure and culture where all employees, contractors and visitors have the safest possible work environment. The role will also seek to support the business on its journey to environmental best practice and seek to keep the business aligned with all relevant information and assume the obligations deriving from compliance with environmental legislation.
